

Missouri Assessment Program

MOST-IMPROVED SCHOOLS

*Top Ten Schools in Percent of Students
Moving into the “Proficient” and “Advanced” Levels
(percentage increase from mandatory year administration to 2001)*

Prepared by the
Missouri Department of Elementary and Secondary Education
April 2002

DATA NOTES:

- This year, for the first time, the “Top Ten Most Improved” list recognizes schools for improvement based on the largest net increase in the combined percentage of students scoring Proficient or Advanced from the first year the assessment became mandatory to 2001.
- Schools with fewer than 10 test-takers or less than 90 percent participation for the specific subject/grade assessment in the base year (mandatory year) or in 2001 were not included in the data set used to prepare this report.
- Schools are grouped by size: 1) schools with fewer than 250 students, 2) schools with 250-500 students, and 3) schools with more than 500 students. Grade configuration may affect the size category in which a school is placed. For example, an elementary school or high school that includes the middle grades was placed in a size category based on the total K-8 or 7-12 enrollment.
- Because the middle grades may be included in an elementary school or high school, elementary schools and high schools appear in the junior high-middle school lists.
- More than 10 schools may be listed for a given size category because, in some cases, more than one school achieved the same percent change.
- Health/Physical Education results are not included in this report. The MAP Health/Physical Education exam was required for the first time in 2001.
- Statewide, the percentages of students moving into the “Proficient” and “Advanced” levels since mandatory administration of the assessment are as follows:

ELEMENTARY	Comm. Arts	Math	Science	Soc. Studies
% Change Proficient/Advanced	2.8%	5.9%	10.9%	4.1%
JR. HIGH/ MIDDLE SCHOOL				
% Change Proficient/Advanced	3.7%	2.1%	-0.9%	-0.5%
HIGH SCHOOL				
% Change Proficient/Advanced	-0.8%	5.8%	4.2%	3.7%

- Building enrollments are provided, as well as the percentage of the school’s students receiving free or reduced-price lunch and the percentage of minority students enrolled.
